

I have purchased XM Radio because of it's content and do NOT want interference from other sources on what can be heard. I especially am pleased with the INSTANT TRAFFIC AND WEATHER as I drive over 2000 miles a month and use the information regularly.

I listen to everything offered on XM from adult comedy to Discovery, E, CNN, Fox News and a variety of music not offered elsewhere.

Reject ANY petitions or legislation that limits the providers of satellite radio to choose what is presented.
